

# Getting Connected

- Before you can connect to computers in the network you must install free Citrix client plugin software on your computer.
- Citrix clients are available for several different operating systems including Macintosh.
- The following client installation instructions are for Windows Vista/XP however, Citrix offers clients for most other operating systems.

# Load the Citrix Website

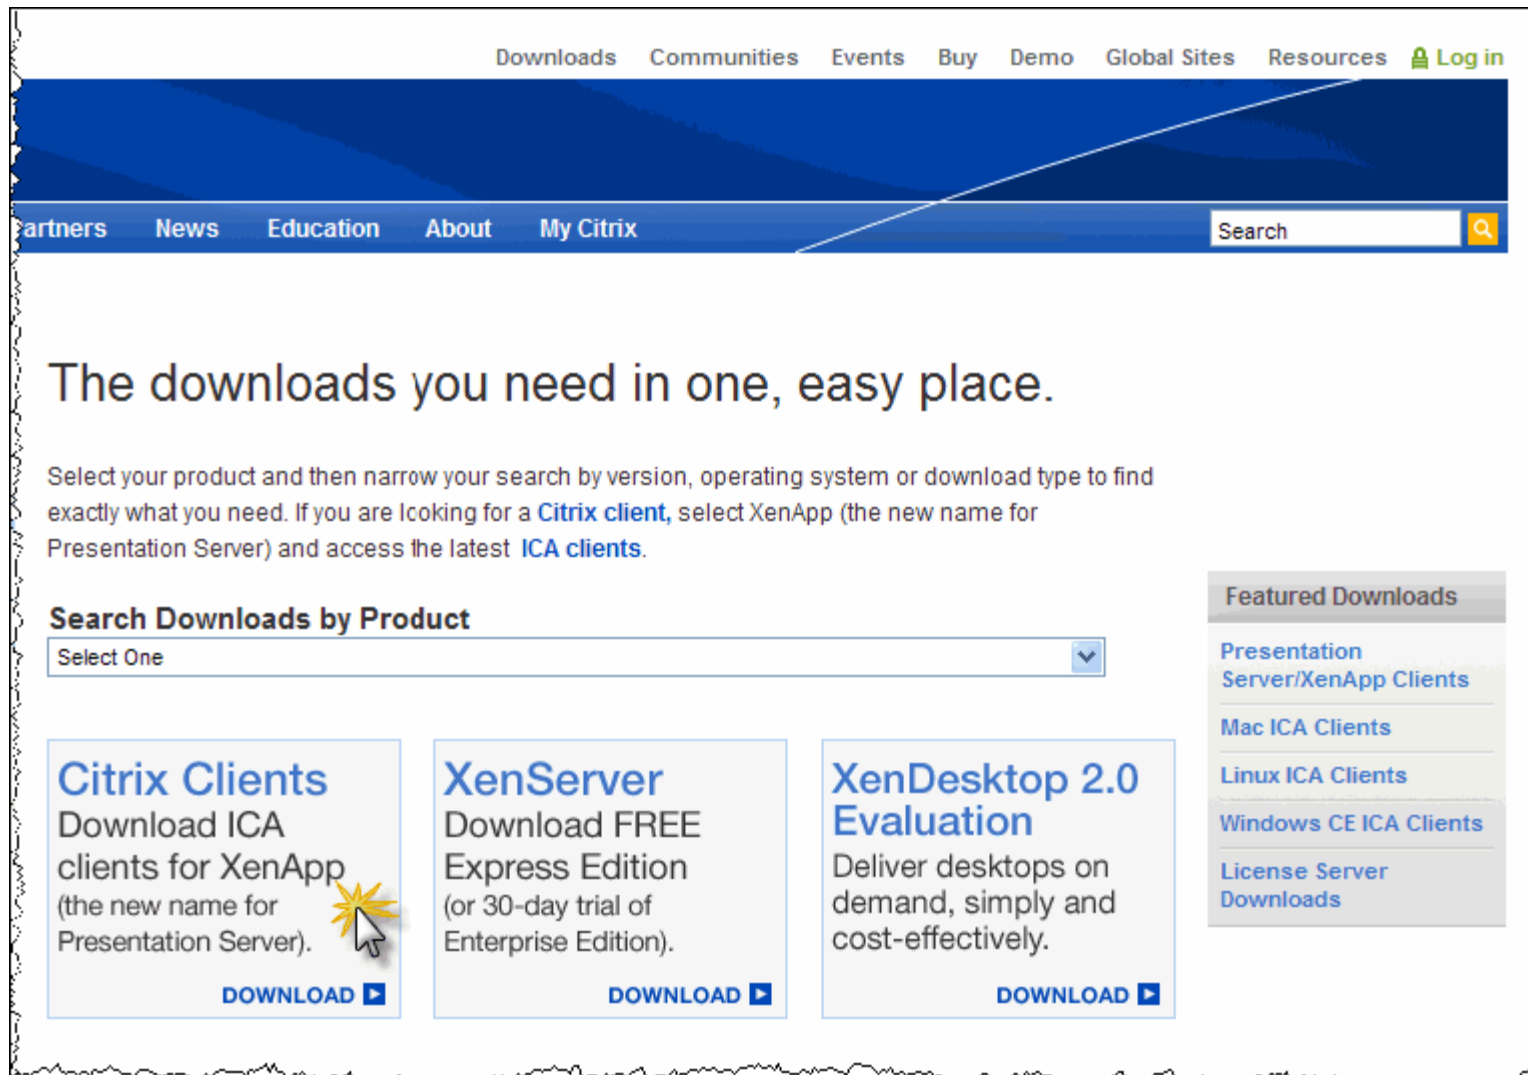

- Launch your web browser and navigate to the Citrix website at <http://www.Citrix.com>.
- Click on 'Downloads' at the top of the page.

# Select Citrix Clients

Select 'Citrix Clients' from the list of downloads.

The screenshot shows the Citrix Downloads page. At the top, there is a navigation bar with links for Downloads, Communities, Events, Buy, Demo, Global Sites, Resources, and a Log in button. Below this is a secondary navigation bar with links for Partners, News, Education, About, and My Citrix, along with a search box. The main content area features the heading "The downloads you need in one, easy place." followed by a paragraph explaining how to search for products. A "Search Downloads by Product" dropdown menu is set to "Select One". Three product cards are displayed: "Citrix Clients" (Download ICA clients for XenApp), "XenServer" (Download FREE Express Edition), and "XenDesktop 2.0 Evaluation" (Deliver desktops on demand). A "Featured Downloads" sidebar on the right lists: Presentation Server/XenApp Clients, Mac ICA Clients, Linux ICA Clients, Windows CE ICA Clients, and License Server Downloads. A mouse cursor is pointing at the "Citrix Clients" card.

# Select XenApp Plugin for Windows

- If you have a PC, select XenApp Plugin for Windows Vista/XP/2003/2000.
- If you have a Macintosh, the client is available further down on the page.

Find all the downloads you need—fast.
